

WELDING UNITS

SA 44V

CNC (3 axes) welder with 4 vertical heads.

QUAD OS 4

CNC welder with 4 horizontal heads.

QUAD OS 9045

CNC welder with 4 horizontal heads: with 45° or 90° corners.

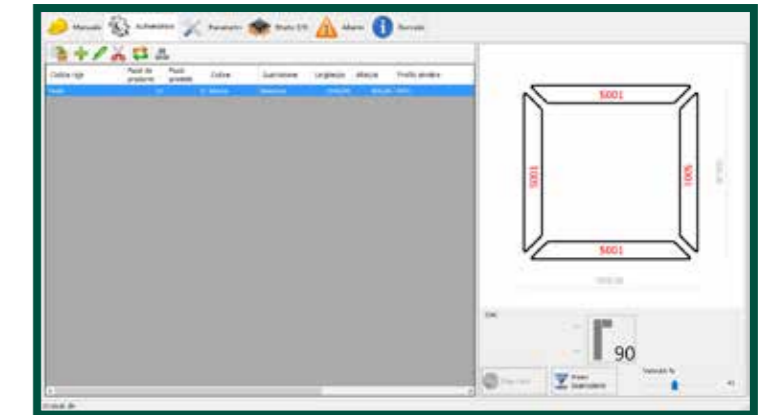

QUAD OS 12

CNC (3 axes) welder with 4 horizontal heads.

SOFTWARE

PQFrame is a CAM program for management of PVC profile welding. The CAM installed on the machine's on board PC allows the welding unit to be connected and receives the production lists from the office. The connection also enables any remote diagnostic activities. PQFrame receives the data for the panels to be welded and transforms it into operating instructions for positioning of the welding heads. The data for the welded panel can be transmitted to PQClean to identify the subsequent welding bead cleaning operation.
